"Service to all who educate."

Note: This is the companion course to Creating the Learning Environment.

Course Description

Learn about in depth thinking strategies to maximize student learning potential. The course will investigate best practice as well as user-friendly strategies to create 21st century problem solvers. Become a facilitator in student learning by empowering them in the learning process. 21st Century Thinking: Understanding Learning is a course based on the foundation and sound research of the Dimensions of Learning model while integrating strategies and technology available for instruction in our ever changing classrooms.

21st Century: Understanding Learning is divided into five weeks. This class will start at 4:00 pm each Tuesday. Each week you will meet synchronously with your instructor(s) for about an hour and a half. You will then have several tasks to complete asynchronously by the following Sunday. The last class will be about two hours long since your only task that week will be to fill out your class evaluation form.

SCHEDULE

Session 1: April 13, 2021
4:00-5:30PM Google Meet - Acquiring Knowledge
Asynchronous tasks to be completed by Sunday, April 18

Session 2: April 20, 2021
